Concurrent Opportunities at SCHS

Central holds partnerships with area post-secondary institutions that allows students to earn college credits through concurrent options. Students in semester 2 classes can enroll for college credit in Physics w/lab, Algebra 2/Trig, Pre-Calc/Trig, Metals 2&3, Accounting, Computer Applications 2 (all SATC), American Justice, and Teaching as a Career (both with Bethany College).

Interested students in the courses listed for Salina Tech will enroll at the school with me during class and enrollment papers will be sent home. Parents can set up a payment plan with Salina Tech as needed after students are accepted.

Credit Check

As the semester is coming to a close, juniors and their families who might be in danger of not completing graduation requirements will be notified early to make the necessary changes to complete the needed credits to receive their diploma May of 2025. This might include after school credit recovery starting in January or summer school. If you are concerned about your child's progress towards graduation, please contact me.

Things to Consider for Senior Year

Internships, student aide, flex schedules, scholarships, FAFSA, ACT/SAT, post-secondary plans including military options. *Have conversations with your child about these topics!*

Central's counseling theme for **December** includes:

-Generosity

Generosity

December's counseling focus is Generosity. Generosity is the act of being kind, selfless, and giving to others. Being generous can increase our overall sense of wellness. We will spend the month sharing information about what it means to be generous, the lasting benefits of generosity, ways to practice generosity, and more. Check out these resources for more information.
